

History combined with modern art,
pronounced by flower decoration
and special accessories.
Altogether charmingly combined in a
municipal hall.
This all is created with flair and
diversity and left by a generous
culture patron - Rudolf Kremayr.

An imposing municipal hall surrounded by the old town centre.

A town museum turns into a jewel searching one's own kind.

After 20 years the Kremayr-museum woke up from a long sleep.

By entering the house you feel like in another world:

Stylish baroque furnitures, rarely collector items and paintings of greatest artists. Historical curiosities tell the history of Rust.

A magnificent vault cellar lightened by romantic candlelight, the green salon, the chimney room and much more invite you to stay here.

The visitors are appreciated by a sea of lights of homelike shining lanterns in the courtyard of the Kremayrhouse.
